Proceedings–Earth and Planetary Sciences

Volume 98 (1989)

CONTENTS

Special issue on Seismology in India

Editorial: A perspective on seismology in India. . . . *James N Brune* 1–6

A preliminary tectonic fabric chart of the Indian Ocean. . . . . *Jean-Yves Royer, John G Sclater and David T Sandwell* 7–24

Anomalous crustal structure beneath the Bay of Bengal and passive oceanic sedimentary basins. . . . *James N Brune and Keith Priestley* 25–30

High velocity anomaly beneath the Deccan volcanic province: Evidence from seismic tomography. . . . . *H M Iyer, V K Gaur, S S Rai, D S Ramesh, C V R Rao, D Srinagesh and K Suryaprakasam* 31–60

Rupture zones of great earthquakes in the Himalayan region . . . . . *Peter Molnar and M R Pandey* 61–70

Active tectonics of the Himalaya . . . . . *James F Ni* 71–89

New seismological results on the tectonics of the Garhwal Himalaya . . . . . *K N Khattri, Ramesh Chander, V K Guar, I Sarkar and Sushil Kumar* 91–109

On intermediate-term prediction of strong earthquakes in the Himalayan arc region using pattern recognition algorithm M8 . . . . . *S C Bhatia, S V Chalam, V K Gaur, V I Keilis-Borok and V G Kosobokov* 111–123

The importance of strong motion seismology in India. . . . . *Bruce A Bolt and James N Brune* 125–132

Upland erosion in a mixed pine forest ecosystem. . . . . *K D Sharma and J F Correia* 133–145

Magnetotelluric survey across Singhbhum granite batholith . . . . . *K K Roy, C K Rao and A Chattopadhyay* 147–165

Mineralogy and chemistry of banded iron formations (BIF) of Tiruvannamalai area, Tamil Nadu . . . . . *N Subba Reddy and A N Sashidhar* 167–172

Holocene marine transgression as interpreted from bathymetry and sand grain size parameters off Gopalpur . . . . . *K Mohana Rao, G V Rajamanickam and T C S Rao* 173–181

Occurrence of thorite and radioactive zircon in syenite pegmatite, North of Ashwaraopet, Khammam district, Andhra Pradesh, India . . . . . *K Surya Prakash Rao, R S N Sastry and Gautam Ray* 183–187

Simulation of a winter circulation over India using a global spectral model . . . . . *S K Dash and B Chakrapani* 189–205

Phase space analysis of Indian summer monsoon rainfall over subdivisions . . . . . *V Satyan* 207–211

Latent and sensible heat fluxes under active and weak phases of the summer monsoon of 1986 . . . . . *P N Vinayachandran, Y Sadhuram and V Ramesh Babu* 213–222

Relationship between the southern oscillation/El Nino and rainfall in some tropical and midlatitute regions . . . . . *R P Kane* 223–235

Diffusion characteristics of the Kakinada Bay for effluent assessment . . . . . *A S Unnikrishnan and V Asthana* 237–245

Observations of mid-tropospheric circulation from water vapour radiances of polar orbiting satellites . . . . . *M S Narayanan, P K Pal, P C Joshi, M M Ali and Baby Simon* 247–254

Canonical sound speed profile for the Central Bay of Bengal . . . . . *T V Ramana Murty, S Prasanna Kumar, Y K Somayajulu, J S Sastry and Rui J P De Figueiredo* 255–263

Wave-induced nearshore circulation along the Calangute-Candolim beach, Goa, west coast of India . . . . . *V Krishna Kumar, C S Murty and A K Heblekar* 265–278

Solar activity and radiative flux divergence in the tropical middle atmosphere . . . . . *K Mohanakumar* 279–286

Anomalous SO_4-Cl groundwater in the coastal aquifer, Kerala . . . . . *D Chandrasekharam* 287–295

Generation of low-frequency oscillations in the subsolar venus ionopause . . . . . *R N Singh and Hari Om Upadhyay* 297–308

On self-similarity of premonitory patterns in the regions of natural and induced seismicity . . . *V G Kossobokov, B K Rastogi and V K Gaur* 309–318

Anomalous geomagnetic variations and possible causative structures along foothills of Himachal Pradesh-Kumaun-Himalaya . . . . . *M V Mahashabde, S Y Waghmare and B R Arora* 319–326

Effect of filtering on drift and anisotropy parameters determined by full correlation analysis . . . . . *H Chandra* 327–338

Stratification and convection over Arabian Sea during monsoon 1979 from satellite data . . . . . *M S Narayanan and B M Rao* 339–352

Cyclone track prediction using INSAT data. . . . . *P K Pal, B M Rao, C M Kishtawal, M S Narayanan and G Rajkumar* 353–364

Harmonic analysis of summer mean wind at 200 mb level during contrasting monsoon years over India . . . . . *S M Bawiskar, S T Awade and S S Singh* 365–373
